Discuss the concepts and importance of natural language in real-world scenario. (C2, PLO1)					
1	Introduction	Provides a comprehensive discussion of the existing problem, clearly justifies the need for the proposed NLP solution and demonstrates strong understanding of the project context	5		0
2	Research Background	Presents relevant background information and discusses several related studies, existing tools, or techniques. The discussion is well-organised and clearly shows how the proposed project differs from or improves upon existing approaches and and supported with references	10		0
3	Methodology	Clearly explains the overall workflow of the proposed NLP solution, including data collection, preprocessing, NLP techniques/models used, and system design. Appropriate diagrams, flowcharts or architecture diagrams are included and easy to understand	10		0
4	Results	Results are clearly presented using appropriate tables, figures or evaluation metrics. The performance of the NLP solution is analysed and discussed logically, demonstrating whether the project objectives have been achieved	5		0
5	Discussion and Conclusion	Provides meaningful discussion of findings, strengths and limitations of the solution. Concludes the project effectively and proposes realistic improvements or future enhancements	5		0
6	Spelling, Grammar and Writing Mechanics	Report is professionally written, well-structured, and easy to understand. Grammar, spelling, formatting, and referencing are consistently accurate with minimal errors.	2.5		0
7	References	Uses sufficient, relevant, and credible sources such as journal articles,	2.5		0
Practice NLP algorithm by using the features and capabilities of natural language processing software. (P3, PLO3)					

8	UI/Output	Interface is user-friendly, well-organised, and easy to navigate.	10		0
9	Programming	Code is functional, well-structured, and demonstrates appropriate	20		0
10	Degree of Completion	All required functionalities are successfully implemented and	10		0
11	System Implementation	The implemented system effectively applies suitable NLP techniques	10		0
Total Documentation and Prototype			90		0
